THEME

THE KNOWLEDGE RESTORATION OF SHOULDER STABILITY

PURPOSE

To provide training in basic principles of shoulder arthroscopy and the operative procedures for shoulder instability.

OBJECTIVES

- To identify the risk factors and mechanism of injury for shoulder instability.
- To diagnose shoulder instability based on a history and clinical examination.
- To understand the radiological findings associated with shoulder instability and the indications of imaging.
- To have an understanding of the management options - conservative, rehabilitation and surgical options for shoulder instability.

WHO SHOULD ATTEND?

- Specialists
- Medical Officers
- Medical assistants
- Nurses
- Physiotherapists
