

Don't Miss Out, Register for May 18th 2017

Flow Cytometer Workshop On Cell Cycle Analysis PI/RNase staining

**Maximum
15 Participants
(seats are limited don't miss the opportunity)**

Registration In-charge

Rabiatul Adawiyah Binti Othman
Admin , NOCERAL Department of Orthopaedic
Surgery, Faculty of Medicine
University of Malaya, 50603 Lembah Pantai
Kuala Lumpur, Malaysia
Tel: +603-79677873 Fax: +603-79494642
rabiatuladawiyah0106@gmail.com

Organizer's

NOCERAL & PRIMA NEXUS

Work shop fees

Registration by 1st May 2017 – RM 325
Registration by 12th May 2017 – RM 375

Note :

Students can bring their own cells (Maximum 2 samples like untreated, Treated) for their hands-on experiments.

Flow cytometer, commonly referred to as FACS analysis is a laser-based equipment that is widely used to study intracellular molecules as well as cellular surface markers. Flow cytometry analysis is suitable for researcher looking for analysis of multiple parameters in single cell. With the high flow rate and sensitive PMT, modern flow cytometer is able to detect multiple parameters with the flow rate of 100,000 events per second

Applications

Apoptosis/Necrosis
Detection, Mitochondrial Membrane Potential, TUNNEL Assay, Cell Cycle Analysis, Oxidative Stress Marker, Intracellular Calcium Content and CD marker detection etc

**Time
8.30 a.m to 3.30 p.m**

**Lunch will be
Provided**

**UNIVERSITY
OF MALAYA**
KUALA LUMPUR
