COURSE INFORMATION

Welcome Message

It is our greatest pleasure to welcome you to this National Trauma Course 2016. This course is designed for master students, as well as medical doctors who have special interest in trauma. The lecture topics of this course are designed to cover the basic principle and essential knowledge in trauma surgery. We have also dedicated a series of case studies sessions (i.e. clinical examination and discussion), where the trainee will be taught on the details of clinical examination technique and surgical approaches to trauma cases. During this 3-day – 2 - night course, we hope to communicate invaluable knowledge, as well as to sharpen your examination skills.

Yours Sincerely,
Dr. Mohd Hadizie Din
Organising Chairman

Objective

- To provide knowledge in managing common and complex fracture.
- To evaluate and recognize the special problem related to fractures in the immature skeleton, pelvic injury, osteoporotic fracture, postoperative infection and nonunion
- As a preparation for post graduate students for BSE & CBO examinations specifically, and updating knowledge for Orthopaedic practicing doctors and surgeons in general.
